PROJECTS

Shree construction
JANUARY 2024
- The system will include modules for managing estimation stages, government and registrar office interactions, plot resell by third parties, marketing details, task management, and customer management. Key functionalities will cover work coordination, contractor management, accounting, stock control, CRM, and robust reporting features. The platform will support multiple user logins, ensuring secure, role-

based access for efficient and collaborative workflows among diverse users.

Sitesmart (ERP)
JUNE 2023

- Develop a robust ERP system tailored for construction site management. This system will encompass essential functionalities such as work management, task tracking, contractor coordination, QA/QC processes, purchases, stock control, CRM, and detailed reporting. The platform will support multiple user logins, ensuring role-based access and collaborative workflows among different stakeholders. The system aims to streamline operations, enhance communication, and provide real-time insights to improve efficiency and productivity on construction sites.

Dattajirao parashram mane saraf
APRIL 2023

- The scope of the e-commerce website project encompasses the development of a user-friendly online platform allowing customers to register, browse products, add items to their cart, securely process payments, and manage orders.

Mahalakshmi Enterprises
DECEMBER 2022

- Mahalaxmi Enterprises transport management web application
- This project aims to assist transportation companies in effectively managing their vehicles and tracking their locations. It includes modules such as booking, placement, control, loading, unloading, PDO, and accounting. The booking module allows the addition of booking details such as origin, pick-up time, loading time, unloading time, and destination. After booking, the system assigns a vehicle, driver, and placement details, followed by the loading and unloading processes. If a vehicle breakdown occurs, this downtime is also documented. The accounting module generates voucher numbers and dates, with added functionality for Excel importing. Admin manages users, defines roles, and grants access to specific modules for data input

IIVRVF
JULY 2022

http://www.iivrvf.org

- IIVRVF Project Overview: This project involves creating a web application with multiple user login functionality, where the admin can manage user roles and add new users. Users can join events based on their assigned roles, and Rezerpay payment gateway will be integrated for event registrations. The registration process will offer various membership options decided by the admin. Email notifications will be sent to users for successful registrations and event participation. Additionally, the application will include a quiz competition feature for user engagement. Alongside, a dynamic website will be developed to showcase comprehensive information about the organization, its mission, team, and activities.
